 - Optional: Bootstrap for styling

Timeline:

Estimated Project Duration: 5–7 days

Cost Breakdown:

Description	Amount (INR)
Hosting and Domain	₹7,000
Frontend Development	₹7,000
Static Contact Form Integration	₹3,000
Total	₹15,000

Static Website – Description

A Static Website is a professionally designed and responsive web platform built using HTML, CSS, and JavaScript. It is ideal for schools that need a simple and cost-effective online presence to display essential information. The content on a static website does not change dynamically and is manually updated when required.

This website is structured to provide clear and accessible information to students, parents, and visitors. It includes key sections such as Home, About Us, Teachers, and Contact, ensuring the school's values, staff, and communication details are well-represented.

The design is mobile-responsive, ensuring compatibility across smartphones, tablets, and desktops. A static contact form can be integrated using third-party services for easy communication.

This type of website is best suited for schools that do not require frequent updates and prefer a lightweight, fast-loading, and easy-to-maintain online platform.

Terms & Conditions:

- 50% advance payment, 50% upon completion
- Hosting & domain charges are not included
- Maintenance or content changes after delivery will be charged separately
- Delivery includes all source code and site files

Thank you for the opportunity. Looking forward to working with you.

Best Regards,
